Boston, MA | *Available January – August 2026* | 610-500-3172

Education

Northeastern University, Boston, MA — Expected Graduation: **August 2027**

B.S. in Computer Science, **GPA: 4.0/4.0**, John Martinson Honors Program

Relevant Coursework: Algorithms & Data, Object-Oriented Design, Cloud Computing, Introduction to Databases, Computer Systems, Foundations of Data Science, Foundations of Cybersecurity, Logic and Computation

Technical Skills

Languages:	JavaScript/TypeScript | Java | Python | SQL | R | HTML | CSS
Frameworks/Libraries:	React | Node.js/Express.js | Prisma | Tailwind CSS | Material UI | JUnit | Vitest
Tools/Services:	Git | GitHub | PostgreSQL | MySQL | Postman | Docker | Figma

Experience

Quak Travel | Software Engineer Intern (*Remote*) — March 2025 – Present

- Architected hotel booking, payment-splitting, and itinerary features with **RESTful APIs** using **Express**, **Prisma**, and **TypeScript**, delivering a prototype **33% faster** than scheduled and helping secure **$30,000** in funding**.**
- Implementing a cross-platform frontend redesign using **React**, **Tailwind CSS**, and **Material UI**, translating **Figma** mockups into production-ready feature components.
- Integrating **Redis** caching system into hotel searching, reducing query latency by **up to 80%** for high-traffic destinations and increasing overall API fetching efficiency.

Rainfall Learning | Software Technical Lead (*Remote*) — June 2025 – Present

- Auditing and managing **GitHub** deliverables, driving the implementation of curricula, scheduling, and interface features, streamlining collaboration across a cross-functional team of **20+ developers and designers.**
- Directing Internal Tooling team of **4 developers** to integrate a B2B payment system using **Express** and **Stripe API**, enabling transactions from tutees to tutors.
- Constructing earnings logic and Stripe transaction routes using **Prisma** to develop financial analysis, Stripe onboarding, and payment intent endpoints for users.

Northeastern: Khoury College of Computer Sciences | Teaching Assistant (*Boston, MA*) — August 2025 – Present

- Supporting a cohort of **500+ students** in mastering Discrete Structures topics including combinatorics, graph theory, algorithmic efficiency, logic, induction, and proofs.
- Supplementing student learning through recitations with **30+ students**, weekly office hours, addressing questions via Piazza, and delivering detailed feedback on assignments.

Northeastern Electric Racing | Software Engineer (*Boston, MA*) — January 2025 – Present

- Engineered a scalable parts overview component using **React** and **Material UI** with description, status, and notification features, resulting in enhanced ticket visibility and reviewing efficiency.
- Developing custom components and expanding backend services/hooks (**Express**, **Prisma**) for a PDF parsing system, collaborating via **Git** version control workflows to deliver new FinishLine website features.

Projects

CoDesign | Frontend Engineer — January – March 2025

- Spearheaded frontend development for posts, profiles, messaging, matchmaking, and authentication, engineering reusable UI components using **React** and **Tailwind CSS**.
- Deployed platform on **Netlify** and showcased key social media features to **100+ people** at Northeastern's Oasis Demo Day, resulting in positive feedback related to user experience and scope.

RoadQuest | Frontend Engineer — February 2025

- Assembled key frontend features involving authentication, leaderboards, and dynamic quest generation using **React** and **Tailwind CSS** to ensure a seamless user experience for real-time gameplay.
- Presented prototype at HackBeanpot, demonstrating road quest formation and live user authentication.
